Abstract

Nitela carinifrons Li, Li & Ma, 2025 a junior homonym of *N. carinifrons* Menke, 1968, is replaced with *Nitela scabrirugata* Li, Li & Ma, **nom. nov.**

Keywords

Homonymy, *Nitela*, replacement name

In a recent publication (Li et al. 2025), one of new species of *Nitela* from China was described as *Nitela carinifrons* Li, Li & Ma. The name of this new species turned out to be preoccupied by *N. carinifrons* Menke, 1968, a species described from Costa Rica (Menke 1968).

In accordance with Article 60 of the International Code of Zoological Nomenclature (International Commission on Zoological Nomenclature 1999), the junior homonym is replaced with a new name, *Nitela scabrirugata* Li, Li & Ma, **nom. nov.**

Copyright *Chengfang Li et al.* This is an open access article distributed under the terms of the Creative Commons Attribution License (CC BY 4.0), which permits unrestricted use, distribution, and reproduction in any medium, provided the original author and source are credited.

Etymology. The species name *scabrirugata* is derived from the Latin stem "scabr" (scabrous) and the Latin word "rugata", referring to the pronotum having relatively regular, sub-parallel, and longitudinal rugae of this species.
